

Small, Maneuverable, Precise

Unrivalled precision. Universal compatibility.

For the Most Challenging Places

The PC-series Level Best box is a smaller version of the popular skid steer model, bringing the same high performance to the compact tool carrier market. The PC Series turns these little loaders into Precision Grading machines.

Nothing Else Like It

This is the smallest, most maneuverable laser grading combination available today. The unique frame design delivers unparalleled control, efficiency, and smoothness. The push-pull design of the Level Best box takes advantage of the directional efficiency of the loaders.

Flexible, Upgradeable, Precise

The Level Best PC Series box has a modular valve system built in that can be quickly and affordably upgraded from a single mast Level Best box into a dual mast box, which makes this a very popular option for smaller scale Precision Grading applications.

- The industry's only Precision Box Grader accurate to 0.1" of spec
- Mix & Match universal compatibility with all power and guidance systems
- No daily maintenance - helps maximize profitable uptime
- Faster to achieve a consistently smooth, highly accurate grade
- One of the most flexible and productive attachments available

Grades in both directions to help optimize productivity

About The Level Best PC Series for Compact Tool Carriers

Engineered for Compact Tool Carriers

Compact tool carriers work in tight places, but they're no toys. Level Best Precision Graders make them highly effective for Precision Grading in cramped working conditions.

The Level Best PC Series works like a tool carrier - in both directions filling in low spots and clearing high spots.

The result is making short work in small spaces without compromising accuracy to within 0.1" of spec. There's nothing else like a Level Best Precision Grader for working with today's versatile compact tool carriers.

PC Series Features

- Four available widths: 48", 54", 60", 66"
- Push-pull design grades forward and in reverse
- Reversible cutting edge on all sides
- Convex mirror provides visibility of moving material
- Powder-coated finish
- Foam-filled tires on oscillating axle
- Several quick attach mounts available for CTCs
- Single mast units easily upgraded to dual mast
- Comes 3-D ready
